WALK-IN COLD STORAGE ROOMS >

- Prefabricated modular construction, designed and constructed for exact size, easy field installation and future disassembly, enlargement or relocation
- Foamed-in-place polyurethane panels in 4" thickness (standard). 3.5", 5", and 5.5" & 6" also available
- Panels are NSF listed

PANEL INSULATION >

- HCFC free Class 1 fire rated polyurethane foam core, UL-723, <=25 flame spread and smoke developed <=450, in accordance with ASTM E84
- K factor of foam is .125
- Insulation contains 97% closed cell structure with an average 2 pounds per cubic foot density and conforms to international standards for ozone depletion contribution

UNIQUE STRUCTURAL DESIGN >

- Utilizes lower cost soft-nose construction where customization is not required
- Hard-rail panels only used where required
- Hard-rail floors provide the greatest structural support for performance and integrity over the life of the walk-in unit

GREATER SPAN > GREATER HEIGHT

- Hard-rail span up to 25' unsupported
- Soft-nose unsupported span is 40% less

Soft-Nose Span 40% LESS

Hard-Rail Span UP TO 25'

SWING DOORS >

- Standard cooler and freezer door sizes are 34" x 78" flush door construction with PVC door leaf and jamb assembly with magnetic gaskets
- Freezer doors include frame and threshold heaters and heated air vent
- Door finishes match panel finishes inside and out
- Doors include handles with padlock provision and inside safety release
- Door frames include toggle switches with pilot light and 2" flush mount thermometers
- **Options include:** flush door construction (frame and leaf made with PVC extrusion), cylinder locks, recessed j-boxes and concealed conduit, aluminum diamond tread or stainless steel kick plates, strip curtains and windows

WARNING: This product can expose you to chemicals including lead, which are known to the State of California to cause cancer, birth defects, or other reproductive harm. For more information, go to <http://www.P65Warnings.ca.gov>.

SLIDING DOORS >

- Single slide and bi-part sliding doors available with either manual or electric operation
- Door finishes match panel finishes
- Optional hoods fully cover the door tracks

FLOORS >

- Pre-fabricated floors are available, rated for foot traffic
- NSF approved floors include NSF cove formed and foamed in place in the floor panel
- Wear surface includes .080" smooth aluminum or .080" low profile aluminum diamond tread
- Reinforced floor panels available with 3/4" plywood underlayment to support hand trucks and/or manual pallet jacks
- Insulated concrete floors (by a qualified contractor) are recommended for freezers with traffic loads exceeding 750 pounds per square foot – Artic Temp can provide the vapor barrier, insulation, thermal breaks and insulation

CLOSURES AND TRIM >

- Optional matching trim strips panels between walk-in walls, building walls and ceilings for vertical and ceiling closures as necessary
- Optional seismic tie-downs and wet stamped engineering drawings are available for areas where required by code

OUTDOOR WALK-INS >

- Membrane roof with tapered foam to create a slope for drainage
- Locking bar with tamper-proof fasteners for additional security

STANDARD FINISHES >

EMBOSSSED GALVALUME >
with or without baked-on white polyester paint

EMBOSSSED ALUMINUM >
with or without baked-on white polyester paint

SMOOTH GALVANIZED >
with or without baked-on white polyester paint

CUSTOM FINISHES AVAILABLE, including stucco black, sandstone, 304 #4 stainless steel and galvanized (primed and ready for paint)
