

REPLACEMENT FLOORING

A Cost-Effective Option to a New Walk-in Cooler/Freezer

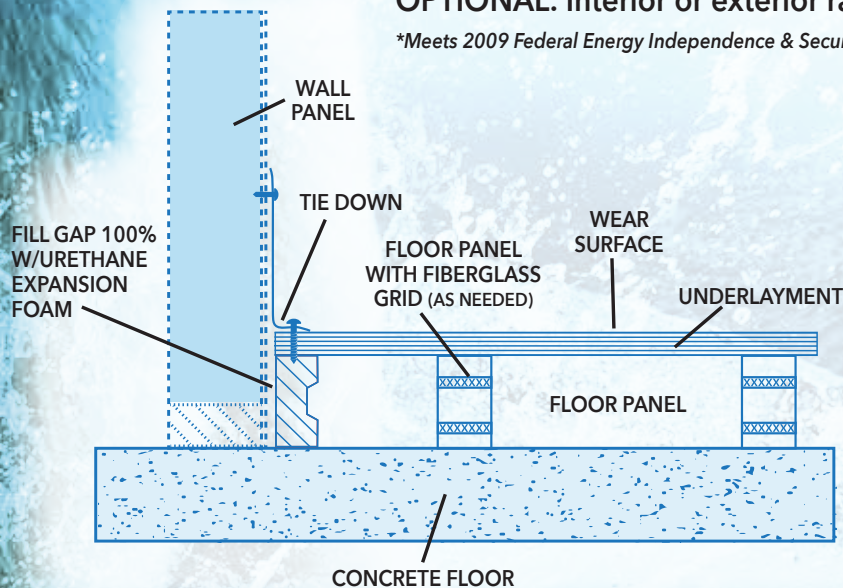

Replace damaged or worn-out floors in your cooler/freezer or convert a cooler unit to a freezer with our drop-in floor panels.*

- Improves efficiency
- Saves on energy costs
- Ends product loss caused by temperature fluctuations
- Extends the life of the unit
- Installs quickly without disassembly

Our replacement, or drop-in, floor panels are 1" smaller than the existing inside dimensions of the cooler/freezer. The ½" gap around the perimeter is filled with spray foam, then covered with the cove base.

OPTIONAL: Interior or exterior ramps

**Meets 2009 Federal Energy Independence & Security Act Requirement*
